1 Introduction

This document has been created to provide Feature Analysis for a platform called “**Habino**”. It begins by outlining the introduction and the system's purpose, followed by the scope of the system and feature analysis.

1.1 Purpose

This document provides a detailed overview of “**Habino**”. It is intended to help project managers, business analysts, developers, requirements engineers, clients, and other stakeholders understand the system's functionalities, features, and requirements. Moreover, it will serve as a foundation for future system updates and the development of subsequent versions.

1.2 System Scope

Habino is a smart real estate platform that streamlines property discovery, sales, rentals, and market insights for both residential and commercial sectors. **Buyers** can explore listings using advanced search filters, view 3D walkthroughs, track favorites, and access market trends. **Sellers** can list and manage properties with media, pricing, and feature details, monitor buyer engagement, and manage offers. **Admins** ensure smooth platform operations by verifying users, moderating content, managing listings, and maintaining compliance and security across all activities.

1.3 System Features

1.3.1 Buyer

- View Onboarding Screens
- Authentication
 - Set up Account (Email, Password, Confirm Password)
 - Sign Up with Google
 - Verify Account (Email, OTP)
 - Sign in (Email, Password)
 - Sign in with Google
 - Reset Password
 - Logout
- View Home/Landing Page

- Search Property by location
- Apply Filter on Property(All, For sale, For rent, For commercial)
- Clear applied filter on Property
- View Featured Properties List (Picture, Name, Price, Location, Total Bedrooms, Total Bathrooms, Total Garage)
- View Footer (Product, Home, Features, Properties, Resources, Blog, Contact, Career, Help Center, Get Updates via Email, Social Media Platforms (LinkedIn, Instagram, Facebook, X))
