

HABINO

Find your space anytime anywhere

Executive Summary

- Habino is a mobile-first property platform that verifies listings, digitizes documents, and delivers analytics for individuals and corporate clients across Kenya, Ethiopia, and Tanzania.
- The platform addresses trust and fragmentation in East Africa's \$8B+ property market with a hybrid B2C / B2B revenue model. MVP ready for 2025 launch; raising \$150k Pre-Seed to complete product, execute market entry, and reach initial monetization targets.

Key asks / highlights

- Raise: \$150,000 Pre-Seed (target runway 14–16 months)
- Target market: Urban East Africa (TAM: \$8.5B+)
- Projected 2027 revenue: \$1.72M (conservative)
- Team: real-estate ops + growth + regional marketing

Market Overview

- East Africa is undergoing rapid urbanization and digital adoption. Combined populations of Kenya, Ethiopia, and Tanzania exceed 240M and urbanization is projected above 40% by 2030.
- Smartphone penetration among young adults and near-ubiquitous mobile payments (M-Pesa, Telebirr, TigoPesa) create a rare convergence: demand for housing + digital payments + mobile-first behaviors.

Visual evidence is going to be added here

Market Problem in Detail

- Property markets in East Africa remain highly informal. Listings are scattered across social media and classifieds, verification is rare, price discovery is opaque, and communications are fragmented across messaging apps.
- This leads to time-consuming transactions, elevated fraud risk, and low conversion rates for agents. The market lacks standardized data and workflows — creating a structural opportunity for a verification-first platform.

Pain Points

- 70% of listings unverified (fraud risk) — placeholder stat
- Time to close rental or sale: high (multiple weeks; manual negotiations)
- Agents and landlords lack centralized tools and analytics
- Remote buyers (diaspora) have limited reliable access

Lets add visual and graphics evidence here too if available

Why Invest in Habino

- **Massive Untapped Market:** >\$10B annual property transaction volume with no unified, trusted digital layer.
- **First-Mover Advantage:** First verified, multilingual property platform serving Kenya, Ethiopia, and Tanzania simultaneously.
- **Proven, Localized Team:** Founders with on-ground experience in real estate, digital growth, and B2B sales in the region.
- **Strong Unit Economics:** CAC–LTV ratio >1:8 with >75% gross margin potential.

Cont...

- **Scalable Product Roadmap:** MVP ready → analytics tools → SaaS property management → regional expansion.
- **Revenue Recurrence Built-In:** Dual B2B/B2C model ensures predictable income through subscriptions and add-ons.
- **Aligned with Market Trends:** Rising smartphone usage, digital payments, and diaspora investment demand transparency and trust.

User Personas & Pain Points

Short descriptions for three core personas:

- **Urban Renter (25–35):** Wants verified listings, quick booking, and digital paperwork to rent safely without repeated in-person visits. Habino gives them verified listings, document upload, and direct booking.
- **Agent / Landlord (SMB):** Needs visibility, easy listing management, and conversion tools. Habino's corporate dashboard and boosted placements increase leads and reduce vacancy time.
- **Diaspora Investor:** Requires reliable market data and remote access for buying or managing property. Habino's analytics and verified listings enable remote investing and property monitoring.

The Habino Solution (Ecosystem Map)

- Habino is a single platform combining verified listings, in-app documentation, mobile-payment integration, and analytics.
- The product is built around two profiles: Regular Users (search, book, document uploads) and Corporate Profiles (multi-listing management, calendar, analytics).
- Verification is the network's trust layer — every verified listing increases the platform's aggregate credibility.

Core components

- Listings & verification engine
- In-app documents & identity checks
- Integrated calendar & scheduling for viewings
- Payment flows (M-Pesa, Telebirr, TigoPesa)
- Corporate analytics dashboard

Product Walkthrough

Visual elements from the figma design is going to be added

Market Size (TAM / SAM / SOM)

- **TAM (Total Addressable Market):** East African property transaction volume — ~\$8.5B+ annually (sales + rentals).
- **SAM (Serviceable Available Market):** Digital-savvy urban transactions suitable for platform capture — ~\$1.3B.
- **SOM (Serviceable Obtainable Market):** Target initial 3-year revenue opportunity across Kenya & Ethiopia with partial Tanzania entry — \$50–70M.

Competitive Landscape

- The market includes legacy classifieds, regionally-focused portals, and thousands of informal agents.
- Competition is fragmented: some platforms focus on listings without verification; others are general classifieds. Habino's advantage is a combined verification layer, localized languages, payment integrations, and a B2B analytics product.

Our Competitive Advantage

- **Verification Engine:** Operational process + data layer for verified listings and agents.
- **Network Effects:** More verified items increase user trust and retention.
- **B2B Analytics & Dashboards:** Revenue and stickiness from corporate customers.
- **Localized Product:** Multilingual UI (English, Amharic, Swahili) and local payment integrations.
- **Lean, data-driven growth:** Influencer + agent networks for low CAC.

Business & Revenue Model

Habino's revenue model mixes recurring subscriptions from corporate clients and premium users with performance (boosted listings, ads) and higher-margin SaaS products introduced later.

Revenue streams & sample pricing:

- **Corporate Subscriptions:** Tiered packages for agents/developers (example: \$50–\$250 / month).
- **Boosted Placements / Ads:** CPC/CPM model for visibility.
- **Premium User Accounts:** \$3 / month for power-search & priority support.
- **Analytics Dashboard:** \$10 / month add-on for advanced insights.
- **Future:** SaaS property management (higher ARPU).

Go-To-Market & Growth Plan

- **Channels:** Influencer campaigns, local ambassador programs, partner agents, partnerships with property associations, performance ads.
- **Sales motion:** Digital onboarding for consumers; targeted sales & onboarding for corporate accounts (agents, developers).

Phases:

- **2025:** Kenya + Ethiopia MVP launch — influencer-led user acquisition + 20 pilot corporates.
- **2026:** Tanzania rollout + analytics onboarding.
- **2027:** SaaS product add-on and broader regional scale.

Early Traction & Validation

- Prototype & MVP development: backend + UI complete (placeholder).
- 1,500+ listings captured in pilot pipeline (placeholder).
- 20+ corporate leads / onboarding requests.
- 15 influencers/content partnerships committed for launch.
- Letters of intent (LOIs) from property managers (placeholder).

Financial Projections (3 Years)

Assumptions (brief):

- Moderate uptake of premium accounts and corporate tiers.
- Gradual roll-out to Tanzania in 2026.
- SaaS modules begin contributing in 2027.

Year	Revenue	YoY
2025	\$165,000	—
2026	\$632,000	+282%
2027	\$1,720,000	+172%

Unit Economics & KPIs

- CAC (B2C): $\approx$ \$2.50 (estimate)
- LTV (B2C): $\approx$ \$25
- CAC (B2B): $\approx$ \$30
- LTV (B2B): $\approx$ \$200
- Gross Margin: $\approx$ 70–75%
- Payback Period: $\approx$ 3–8 months (varies by segment)

Low CAC via digital & influencer channels combined with subscription retention gives a favorable payback and attractive LTV/CAC ratios.

Funding Ask

Ask: \$150,000 Pre-Seed (seeking strategic angels + regional investors)

Use of funds (percent):

- 50% Product Development — verification engine, payments, API integrations
- 25% Marketing & Launch — influencer campaigns, paid media, agent incentives
- 25% Operations — hires, legal, regional entity setup, compliance

Runway: 14–16 months to key milestones (MVP completion, 10k users, first 50 corporate subs).

Roadmap to Series A

- **Pre-Seed (Now — 2026):** Complete MVP, launch Kenya & Ethiopia, secure pilot corporates.
- **Seed (2027):** Expand Tanzania, scale corporate onboarding, launch analytics subscription.
- **Series A (2028):** SaaS product scale, regional expansion, target \$5M+ revenue.

Team & Advisors

- Mathis Barthen — Founder & CEO: Real estate entrepreneur with 10+ years experience in property investment and development. Leads strategy and partnerships.
- Nahom Mekbib — Co-Founder & Head of BizDev: Growth and sales strategist with experience onboarding enterprise clients in East Africa.
- Yordanos Fantahun — Co-Founder & Head of Growth: Digital entrepreneur and marketing strategist who scaled regional digital campaigns.

Partnerships & Future Opportunities

- Payment providers: M-Pesa, Telebirr, TigoPesa (integrations planned/confirmed).
- Local real-estate associations & broker networks — onboarding partners.
- Potential API integration partners: title/verification providers, local banks for mortgage pilots.

Impact & Sustainability

Habino drives economic inclusion by digitizing offline agents and providing verified access to housing. Increased transparency reduces fraud, protects renters, and supports formalization of property markets — which aligns with smart-urbanization and financial inclusion goals.

- Reduces fraud & disputes
- Enables financial inclusion & remote investment
- Supports local jobs via agent digitalization

Exit Strategy & Comparables

Potential exit routes include acquisition by regional PropTech incumbents, strategic buyouts by telecoms/fintechs that want property data, or a broader regional roll-up by a global property platform. Comparable exits include regional classifieds and marketplace buyouts — leading to 5–15x returns in favorable scenarios.

Investment Summary

- Round: Pre-Seed
- Ask: \$150,000
- Target Valuation: \$1.2M pre-money (confirm)
- Use: Product (50%) / Marketing (25%) / Ops (25%)
- Runway: 14–16 months to key milestones
- Expected outcome: Demonstrate unit economics and secure seed round in 12–18 months
